A Sikorsky Company

Composite Technology, Inc.

Your global solution to blade repairs and composite services

Rotor Blade Repair Experts

Whether you operate one or 100 helicopters, we understand the importance of improving operations, lowering aircraft down time and avoiding AOGs.

For more than 40 years, Composite Technology, Inc., a Sikorsky company, has specialized in the repair of both metal and composite rotor blades. Its multi-manufacturer blade services, international presence and field repairs allow you to operate your helicopters more efficiently and cost-effectively.

Above and Beyond Blade Repairs

Composite Technology:

- > Provides multi-manufacturer repair, blade sale/lease/exchange and OEM warranty claims
- > Develops expanded OEM certified and approved blade repairs as well as preventive maintenance solutions
- > Manufactures composite structures

Composite Technology's new 6,000 shaft horse power Whirl Tower is a blade balancing system that offers bi-directional rotation with one of the most powerful drive systems for dynamic balance operations. It is capable of accommodating rotor blades for any of today's major helicopter manufacturers.

Your Global Solution to Rotor Blade MRO Services

Since 1972, Composite Technology has worked closely with OEMs to make sure its repairs meet or exceed OEM and statutory requirements. Composite Technology is an approved repair service center for multiple manufacturers.

Why Composite Technology

Unmatched Convenience:

- > Unique blade repair center approved by AgustaWestland, Airbus Helicopters, and Sikorsky Aircraft
- > 4 facilities worldwide
- > Blade repairs performed in the field

Exclusive Cost-saving Research & Development:

- > Protective blade erosion STCs and patents
- > OEM approved expanded blade repairs
- > Design and fabrication of composite and metal components

Unsurpassed Quality:

- > 40-year safety track record servicing commercial & military fleet
- > AS9100/9110 Registered by SAI Global
- > Industry leading 2,000-hour/three-year warranty
